EDUCATION

University of Southern California

M.S. in Computer Science (Artificial Intelligence)

Los Angeles, California

Aug 2026 - May 2028 (Expected)

Vellore Institute of Technology

B.Tech in CSE with Specialization in IoT

Vellore, Tamil Nadu

Aug 2021 - Apr 2025

- Cumulative GPA: 8.7/10.0
- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object Oriented Programming, Computer Networks, Analysis and Design of Algorithms

WORK EXPERIENCE

SIEPL Innovations Pvt Ltd | AI/ML Developer

Dec 2024 - Jul 2026

- Developed an AI chatbot using Python, React, MongoDB, supporting 500+ students and increasing engagement by 40%.
- Integrated multilingual NLP, expanding access to 3+ regional languages and reducing support dependency.
- Optimized backend with asynchronous processing and load balancing, achieving 99.5% uptime and 35% lower latency across 200+ use cases.

PAMP Technologies | Java Developer Intern

Aug 2023 - Oct 2023

- Designed and implemented APIs using Java for frontend and backend systems, reducing API response time by 25%, improving user experience and system performance.
- Created and executed over 150 unit tests, achieving 98% code coverage to ensure code reliability and correctness.
- Identified and fixed bugs using debugging tools, improving performance and minimizing downtime.

PROJECTS

ResolveAI – AI-Powered Customer Support Platform | *Next.js, TypeScript, Supabase, RAG*

[Github](#)

- Engineered a full-stack RAG-based support platform with Next.js and Supabase, retrieving from a custom knowledge base to auto-resolve 70%+ of routine support queries without human intervention.
- Designed a vector embedding pipeline over OpenAI embeddings for semantic search, improving response relevance by 45% over baseline keyword search across 500+ test queries.
- Deployed a production CI/CD pipeline on Vercel with automated testing, achieving 99.9% uptime and sub-200ms average API response time.

Raftline – Distributed Consensus Visualizer | *Go, WebAssembly, Next.js, TypeScript*

[Github](#)

- Implemented the Raft consensus algorithm from scratch in Go – leader election, log replication, and safety guarantees – compiled to WebAssembly to run entirely client-side with zero backend infrastructure.
- Built a concurrent 5-node cluster simulator using goroutines and fault injection, verified via automated Go tests to guarantee zero split-brain incidents across 100+ simulated network partitions.
- Delivered an interactive Next.js visualization achieving sub-second leader failover, making a core distributed-systems algorithm tangible for non-technical viewers.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, Go, C, SQL, HTML, CSS

Frameworks: React, Next.js, Node.js, Django, REST APIs

AI/ML: OpenAI API, RAG Pipelines, Scikit-Learn, Pandas, NumPy, NLP

Infrastructure: AWS, Docker, Kubernetes, Terraform, Vercel, CI/CD, WebAssembly, MongoDB, Supabase, Git

POSITION OF RESPONSIBILITY

Yantra Neo Hackathon (2024) — Yantra, VIT Vellore

[Certificate Link](#)

- Spearheaded hackathons and coordinated sessions with guest lecturers, engaging over 800 students in Web Development, Biotech, and Artificial Intelligence.

Covid-19 Isolation Monitoring – Project Stepone

[Certificate Link](#)

- Compiled and analyzed detailed reports on COVID-19 cases in Bangalore using Excel and PowerPoint, which were disseminated by management to hospitals, effectively supporting over 50,000 patients in receiving timely consultation and care.
